

Problem-Solution Fit

Date: 30 September 2026

Team ID: SWTID-2026-3656

Project Name: EduGenie – Google Gemini Powered Learning Assistant

Maximum Marks: 5 Marks

Problem

Students need an accessible study companion that can explain, answer, summarize, test, and guide them without switching applications.

Solution

EduGenie combines a local model for concept explanation and Gemini for richer cloud-generated educational features in one FastAPI web application.

User Pain	EduGenie Response	Evidence
Complex topics	Simple local explanation	LaMini prompt requests definition, example, takeaway
Unanswered doubts	Student Q&A	<code>answer_question(question)</code>
Passive revision	Five-question quiz	Validated JSON schema
Long passages	Concise summary	Gemini summary prompt
Unclear study order	Structured learning path	Beginner → intermediate → advanced

MVP Boundary

The current project intentionally avoids authentication, databases, payments, progress tracking, and external LMS integrations. Those belong in future iterations after the core learning workflow is validated.
