

Coding & Solution

Date: 30 September 2026
Team ID: SWTID-2026-3656
Project Name: EduGenie – Google Gemini Powered Learning Assistant
Maximum Marks: 5 Marks

Solution Summary

Field	Actual EduGenie Details
Repository	EduGenie project repository URL to be added by team
Languages	Python, HTML, CSS, JavaScript
Framework	FastAPI with Uvicorn
Cloud AI	Google Gemini using google-genai
Local AI	MBZUAI/LaMini-Flan-T5-783M
Key features	Explanation, Q&A, quiz, summary, learning path
Pending	Authentication, history, analytics, multilingual expansion
Run	python -m uvicorn main:app --reload

Code Quality Checklist

No.	Criteria	Status
1	Modular functions/modules	Yes
2	Meaningful names	Yes
3	Necessary comments	Yes
4	Critical error handling	Yes
5	Runs without critical errors	Yes - verified
6	Version-control repository	URL to be added by team

Notes

The application uses the current Google Gemini Python SDK and preserves the required local Seq2Seq model architecture. The `.env` file is loaded explicitly from the project directory.
